FERTILITY

Fertilizer Rate: 50-100ppm N
EC Range: Moderate
pH Range: 5.6-6.2

TEMPERATURE

Avg. Soil Temperature: Moderate
Day Temperature: 73-80°F (23-27°C)
Night Temperature: 60-68°F (16-20°C)

IRRIGATION

Irrigation Frequency: Moderate

LIGHT

Daylength Neutral?: Yes
Supplemental: None
Benefits From Shade?: No

PINCHING

Pinch?: No

POTENTIAL DISEASES

Botrytis, Pythium, Rhizoctonia

POTENTIAL PESTS

Aphids, Mites, Thrips

PGR SUGGESTIONS

- 1,000-1,500 ppm B-Nine (Daminozide) spray
- 2ppm A-Rest (Ancymidol) as needed to reduce stretch
- 0.05ppm Bonzi (Paclobutrazol) for toning at finish

‘Sunstanding’ QT is ideal for a 306 direct-stick program

TIPS

- Avoid Florel (ethephon) applications on ‘SunStanding’ QT cuttings as it will significantly delay flowering.
- Mist moderately the first 3 to 5 days then only as needed to keep cuttings turgid.
- Water stress in “propagation” phase can delay flowering and compromise the overall quality of the liner, maintain even moisture in propagation.
- ‘SunStanding’ are naturally compact. High light and a moderate water regime are the best method for producing a high quality finished product. Cooler temperatures of 65°F (18°C) days and 55°F (13°C) nights when finishing can be used to tone ‘SunStanding’ Impatiens. Temperatures below 55°F (13°C) will delay the finish time considerably.
- Water early in the day to allow foliage to dry, good circulation and humidity control is important for Botrytis management.
- Good soil aeration is important when preventing root rot type diseases. Use soil mixes that have a high porosity. This can be accomplished with aggregate content at 30-40% of the mix.
- Do not pinch ‘SunStanding’; it will ruin the habit and delay flowering.

\hline
Exposure & \textit{Sun, partial sun} \\
Height & \textit{14-24 inches (36-61 cm)} \\
Garden Spacing & \textit{12-18 inches (30-46 cm)} \\
\hline
\end{tabular}
\end{table}

\section*{DESCRIPTION}

Quick Turn (QT) cuttings arrive in a more mature stage than standard cuttings making them much quicker to finish. Quick Turn cuttings are available exclusively for our SunStanding collection.

\section*{CONSUMER APPEAL}

- Loads of color from Spring through Summer for sun and shade landscape beds. SunStanding are heat tolerant.
- Bright colored flowers are low maintenance and stunning over shiny green and bronze foliage.

\section*{GARDEN ATTRIBUTES}

- Tolerant of most garden conditions and thrive in sun or shade.
- ‘SunStanding’ can be combined with other annuals in containers and in landscape beds.
- ‘SunStandings’ are great for new gardeners that want impact in a sun or shade location. It’s hard to go wrong with ‘SunStanding’!

\section*{VARIETY LIST}

Purple, Cherry Red, Coral Aurora, Fire Red, Hot Pink, Lavender, Lavender Frost, Light Lavender Aurora, Light Pink Aurora, Magenta, Neon Red, Neon Rose, Rose Aurora, Salmon, White Cloud, Orange Aurora
